

Program Educational Objectives

Reviewed January, 2013

The educational objectives of Missouri State University's program in Computer Science are to produce graduates who will during the first several years following graduation:

- Have worked in a broad range of application areas where they have demonstrated the use of computer science skills and techniques.
- Have developed skills and knowledge in the workplace or academia through continued learning.
- Have been practicing industry professions or have pursued academic studies or have made contributions to the profession.
